

To whom it may concern:

Teresa Bottom has been coming into my classroom for the past three years to teach my students the Lifebridge program. I've been thrilled with this program and extremely happy to have it implemented in my classroom. Mrs. Bottom does a wonderful job of presenting the material in ways my students are able to understand. The class is engaged and involved in the discussion and has learned a great deal on treating others and animals with kindness and respect. Mrs. Bottom is able to tie her material on kindness into other content areas and has taken the time to look at our core content standards to ensure she is teaching state mandated content. My students have loved the materials she has brought in for them to keep. The books are easy for students to understand and they genuinely enjoy reading through them and working on the activities. Overall I believe this program has been wonderful in teaching my students the importance of respect and kindness while tying in academics. I sincerely hope Mrs. Bottom continues teaching this program as it's been a benefit to all of my students.
