

Regarding Lifebridge for Animals:

I am writing in praise of the admirable efforts of Lifebridge for Animals located here in Shelby County. Its mission is to provide humane education to younger children in the public schools and to support a low cost spay/neuter program in our area. East Shelbyville Animal Clinic has been a supporter of Lifebridge for some time now. We participate in the spay/neuter program and have generously supported the Shelburne rescue efforts.

Lifebridge has a sterling reputation. It wisely uses the donated funds entrusted to its care. It is unique in that it brings humane education directly to an audience in its most receptive time of life. Education is the best answer to the problem of pet overpopulation. Lifebridge's donation of the spay/neuter clinic is a significant contribution to control the end result of ignorance about animal care. Hopefully, education and spay/neuter will make a dent in the staggering euthanasia rate of unwanted animals. Our clinic is proud to support Lifebridge's mission and I hope all Shelby Countians will become aware of its wonderful work.

Sincerely,  
Dr. Kathy Taylor
